ABSTRACT

This bibliography contains 137 entries related to population migration in rural America. The entries were derived from the AGRICOLA database produced by the National Agricultural Library and include journal articles, government reports, conference papers, extension bulletins, and books. Entries cover such topics as demography, economic growth, employment, income distribution, migration, migrant workers, population change, population distribution, population growth, rural areas, rural development, rural economy, and urban to rural migration. Each entry contains title, author, publisher, publication date, journal or conference information (where appropriate), language, descriptors, and the National Agricultural Library call number. Some entries contain an annotation. Also included are indexes by author and subject and information about interlibrary loan from the National Agricultural Library. (LP)

Bibliographies in the Quick Bibliography Series of the National Agricultural Library, are intended primarily for current awareness, and as the title of the series implies, are not indepth exhaustive bibliographies on any given subject. However, the citations are a substantial resource for recent investigations on a given topic. They also serve the purpose of bringing the literature of agriculture to the interested user who, in many cases, could not access it by any other means. The bibliographies are derived from computerized on-line searches of the AGRICOLA data base. Timeliness of topic and evidence of extensive interest are the selection criteria.

The author/searcher determines the purpose, length, and search strategy of the Quick Bibliography. Information regarding these is available upon request from the author/searcher.

Copies of this bibliography may be made or used for distribution without prior approval. The inclusion or omission of a particular publication or citation may not be construed as endorsement or disapproval.

To request a copy of a bibliography in this series, send the title, series number and self-addressed gummed label to:

The **Rural Information Center** (RIC) is a joint project of the Extension Service and the National Agricultural Library (NAL). RIC provides information and referral services to local government officials, community organizations, health professionals and organizations, cooperatives, libraries, businesses, and rural citizens working to maintain the vitality of America's rural areas. The Center combines the technical, subject-matter expertise of Extension's nationwide educational network with the information specialists and resources of the world's foremost agricultural library.

The Office of Rural Health Policy in the Department of Health and Human Services (DHHS) and the NAL jointly created a Rural Information Center Health Service (RICHS) as part of the RIC. RICHS collects and disseminates information on rural health issues, research findings related to rural health, and innovative approaches to the delivery of rural health care services.

SERVICES:

Provide customized information products to specific inquiries including assistance in economic revitalization issues; local government planning projects; rural health issues; funding sources; and other related issues for the purpose of monitoring the quality of rural life.

Process a broad array of general and funding information requests on such topics as:

- Successful strategies, models, and case studies of community development projects
- Small business attraction, retention, and expansion
- Tourism promotion and development
- Recycling programs
- Community water quality
- Technology transfer to rural areas
- Closures, restructuring and diversification of rural hospital and clinics
- Agricultural health and safety
- Health programs, services, personnel issues
- State initiatives concerning rural health delivery issues

Refer users to organizations or experts in the field who can provide additional information.

Perform brief database searches of requested topics on a complimentary basis.

Furnish bibliographies and Rural Information Center Publication Series titles.

Identify current USDA and DHHS research and Cooperative Extension Systems programs.

Document Delivery Services to Individuals

The National Agricultural Library (NAL) supplies agricultural materials not found elsewhere to other libraries.

Filling requests for materials readily available from other sources diverts NAL's resources and diminishes its ability to serve as a national source for agricultural and agriculturally related materials. Therefore, NAL is viewed as a library of last resort. Submit requests first to local or state library sources prior to sending to NAL. In the United States, possible sources are public libraries, land-grant university or other large research libraries within a state. In other countries submit requests through major university, national, or provincial institutions.

If the needed publications are not available from these sources, submit requests to NAL with a statement indicating their non-availability. Submit one request per page following the instructions for libraries below.

NAL's Document Delivery Service Information for the Library

The following information is provided to assist your librarian in obtaining the required materials.

Loan Service — Materials in NAL's collection are loaned only to other U.S. libraries. Requests for loans are made through local public, academic, or special libraries.

The following materials are not available for loan: serials (except USDA serials); rare, reference, and reserve books; microforms; and proceedings of conferences or symposia. Photocopy or microform of non-circulating publications may be purchased as described below.

Document Delivery Service — Photocopies of articles are available for a fee. Make requests through local public, academic, or special libraries. The library will submit a separate interlibrary loan form for each article or item requested. If the citation is from an NAL database (CAIN/AGRICOLA, *Bibliography of Agriculture*, or the NAL Catalog) and the call number is given, put that call number in the proper block on the request form. Willingness to pay charges must be indicated on the form. Include compliance with copyright law or a statement that the article is for "research purposes only" on the interlibrary loan form or letter. Requests cannot be processed without these statements.

Charges:

- Photocopy, hard copy of microfilm and microfiche – $5.00 for the first 10 pages or fraction copied from a single article or publication. $3.00 for each additional 10 pages or fraction.
- Duplication of NAL-owned microfilm – $10.00 per reel.
- Duplication of NAL-owned microfiche – $ 5.00 for the first fiche and $ .50 for each additional fiche per title.

Billing – Charges include postage and handling, and are subject to change. Invoices are issued quarterly by the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161. Establishing a deposit account with NTIS is encouraged. *DO NOT SEND PREPAYMENT.*

Send Requests to:

USDA, National Agricultural Library
Document Delivery Services Branch, 6th Fl.
10301 Baltimore Blvd., NAL Bldg.
Beltsville, Maryland 20705-2351

Contact the Head, Document Delivery Services Branch in writing or by calling (301) 504-5755 with questions or comments about this policy.

ELECTRONIC MAIL ACCESS FOR INTERLIBRARY LOAN (ILL) REQUESTS

The National Agricultural Library (NAL), Document Delivery Services Branch accepts ILL requests from libraries via several electronic services. All requests must comply with established routing and referral policies and procedures. The transmitting library will pay all fees incurred during the creation of requests and communication with NAL. A sample format for ILL requests is printed below along with a list of the required data/format elements.

Application of the multiple frame design in an economic distributional effects study.
Kleweno, D.G.
Washington, The Service.
ESS staff report - U.S. Dept. of Agriculture, Economics and Statistics Service (AGESS801222.3): 143 p. charts; Jan 1981. 3 ref.

Descriptors: Kentucky; Economic development; Rural areas; Labor supply; Population growth; Employment; Women; Food; Programs; Surveys; Government programs

Abstract: A multiple frame survey design was used to study establishment and household characteristics and to make inferences about the population of interest. The methodology required for frame construction, sampling, field enumeration, and estimation is illustrated. The nine-county Kentucky study was the first of its type attempted by the Statistics unit of the Economics and Statistics Service, USDA, for data collection. Procedures were substantially more difficult than our traditional work. The study was carried out effectively and demonstrates our capability for this type of project. This document was developed because of the unusual nature of the survey; however, it would be beneficial to document all special surveys that the agency conducts. Suggested procedural enhance-

8 NAL Call No: HD1773.A2N6
The attitudes of rural residents toward the expansion of natural resource based economic activities: a comparison between recent in-migrants and long-time residents.
Stout-Wiegand, N.; Bulman, S.D.; Smith, D.K.
Amherst, Mass. : The Council.
Journal - Northeastern Agricultural Economics Council v. 13 (1): p. 40-45; Apr 1984. Includes 14 references.

Language: English

Descriptors: Economic development; Natural resources; Preservation; Migration; Rural areas; Rural population

Abstract: Extract: Rural residents, particularly recent in-migrants, are often characterized by preferences for a tranquil rural lifestyle based on the attributes of an open countryside. A survey of residents of an isolated rural county in West Virginia was conducted to explore the proposition that recent rural in-migrants are more opposed to the growth of natural resource based activities which are detrimental to the rural countryside than are long-term residents of the Country. The hypothesis was not supported, as both recent in-migrants and long-time residents strongly favored economic development of the County's natural resources over preservation of the natural countryside.

Capital constraints on nonmetropolitan accumulation: rural process in the United States of America since the 1960s.
Clark, T.A.
Elmsford, N.Y. : Pergamon Press.
Journal of rural studies v. 7 (3): p. 169-190; 1991. Includes references.

Language: English

Descriptors: U.S.A.; Urban rural migration; Rural population; Capital; Labor; Economic growth; Trends; Employment; Income; Rural urban relations; Change; Trade relations

Abstract: Does the turnaround in net migration to rural areas in the 1970s and its subsequent reversal in the 1980s anticipate a recording of rural process in the United States of America? I conclude that it does. Whereas standard neoclassical theory posits interregional equilibration through the interplay of factor movements and prices, it is here contended that capital supply has become of paramount importance in shaping rural outcomes, and that the nexus of capital control is shifting. The centerpiece of my argument is the partition of capital flows into three distinct circuits, within and among which capital 'switches' in periods of disproportionality, primarily overaccumulation, in search of new investment options or in response to new state-capital conformations. Viewed from this perspective, rural process is found to have

progressed from a period of 'counterbalanced growth' (1960s and early 1970s), toward a period of 'rural overacumulation', and then after the world debt crisis of 1981 to an interval of rural 'consolidation'. During the latter, still underway, the electoral base of Federal support for rural enterprise had begun to erode, and capital had begun to recenter in the urban primary circuit. Rural areas, as well, had become more fully absorbed in national and global capital circuits. Then too, customary alliances in support of rural accumulation had begun to disassemble and new ones had yet to emerge. Futher infusions of state capital in the secondary and tertiary circuits in support of rural accumulation are consequently in doubt. Under these conditions, the restructuring of rural industry may be further slowed, and the formulation of a new urban workforce in nonmetropolitan areas placed in jeopardy.

Descriptors: U.S.A.; Structural change; Population growth; Population distribution; Urban areas; Rural areas; Urban rural migration; Urbanization

Abstract: Extract: The new nonmetropolitan trends have revealed the shortcomings of traditional theories and explanations of population redistribution. As a preliminary step toward increased understanding, we have sought to place one aspect of the turnaround in its historical context by considering specifically nonmetropolitan urban structure and its changes. We have examined interdecade growth of U.S. nonmetropolitan incorporated places, grouped by initial size and location for each decade since 1900.

Rural sociology v. 54 (4): p. 568-586; 1989. Includes references.

Language: English

Descriptors: Utah; Rural communities; Economic growth; Social integration; Social change; Population change; Longitudinal studies

Abstract: Previous research on the social consequences of rapid growth in rural communities has

been hindered by the absence of longitudinal data needed to adequately assess either the extent or timing of various types of social disruptions. This paper focuses on social changes in a western community which experienced extremely rapid growth during the early 1980s as a consequence of energy development activities. Survey daya collected both prior to and during the period of rapid population change were used to examine changes in several indicators of community satisfaction and attachment. The results suggest that some changes indicative of social disruption did occur during the period of rapid growth. However, even greater changes occurred during the period after announcement of the project but before the commencement of rapid growth, suggesting that there are important anticipatory impacts of an expected boom. In addition, there was little evidence that satisfaction or attachment recovered to preboom levels during the subsequent bust phase of the growth cycle, suggesting that disruptive consequences persist for at least some time after the period of rapid growth has ended.

Components of nonmetropolitan population change: the contribution of rural areas.
Lichter, D.T.; Fuguitt, G.V.; Heaton, T.B.
Lexington, Ky. : The University of Kentucky.
Rural sociology v. 50 (1): p. 88-98; 1985. Includes statistical data. Includes 15 references.

Language: English

Descriptors: Rural population; Rural areas; Demography; Aggregates; Population growth; Urban areas; Rural development; Urban rural migration

Abstract: Extract: Despite a general awareness of the dimensions of the non-metropolitan population "turnaround," the role of rural population change in this demographic phenomenon remains less well understood. Using population data from the 1950-1980 decennial censuses, the present paper examines the contribution of various-sized places and rural areas to aggregate U.S. and nonmetropolitan population change during each ten year period between 1950 and 1980. We show that not only were rural areas growing at a faster rate than urban areas during the 1970's, but perhaps as important, rural population change was the driving force behind aggregate population growth in most parts of the nonmetropolitan U.S. Rural areas accounted for over 80 percent of aggregate U.S. nonmetropolitan population change in the 1970-1980 decade.

Abstract: Extract: Evaluation of the effect of farmland prices, urban family incomes, and population growth on loss of prime farmland indicated

that population growth was the most significant factor explaining the loss of prime land in the Sunbelt, particularly in Louisiana. During the period 1960 to 1970 about .51 acre was absorbed by urban expansion for each person added to the population. This compares to urban land occupation coefficients of .21 acre per capita in 1970. Statewide, 92,800 acres of prime farmland were diverted to non-agricultural uses in that ten-year period.

Abstract: Extract: This paper utilizes data from recent urban-origin migrants to the 75 nonmetropolitan counties in the North Central Region experiencing most rapid growth. Results show that researchers should not assume a universal relevance of questions asking for evaluations of community attributes. The data indicate that respondents are objectively assessing particular community attributes when responding to such questions. Global satisfaction measures reflect more than is included in the standard lists of community attributes and tend to reflect satisfaction with a few attributes in particular. Finally, the analysis demonstrates that community satisfaction can help to explain respondents' potential for moving again.

Descriptors: Kentucky; USA; Rural population; Employment; Growth; Rural; Labor supply; Migrant labor

Abstract: Extract: This report presents preliminary findings from a recent ERS survey in south-central Kentucky. It begins to fill a research need for information on the characteristics of persons and households affected by the new pattern of rural growth. Results indicate that (1) inmigrants did not necessarily have an adventage over long-term residents in obtaining jobs in a rapidly growing nonmetro community in south-central Kentucky, (2)

BEST COPY AVAILABLE

most new workers in the area were youth and/or women, and (3) new firms were an important source of new jobs, particularly in the private service sector.

North Central journal of agricultural economics v. 2 (1): p. 25-30; Jan 1980. 9 ref.

Descriptors: Indiana; Schools; Funds; Students; Rural areas; Population change; Expenditures; State government; Regression analysis

Abstract: Extract: Results suggest that declining enrollments have led to increased per pupil expenditures in rural school districts. Increased costs are primarily due to decreases in pupil/teacher ratios. The state aid distribution formula in Indiana does a better job of compensating urban schools for these cost increases than it does for rural schools.

Abstract: We consider here the energy consumption characteristics of migrants and nonmigrants in two northern Wisconsin counties characterized by relatively rapid growth as areas of retirement and recreational activities. Migrants from metropolitan areas use more electricity when measured at the meter and report driving more. Both of these differentials are sustained even after controlling for personal and behavioral variables, appliance ownership, and type of energy use. Metropolitan migrants do not spend more for space heating, although there is again a positive effect on space heating energy consumption net of the other variables. We conclude that metropolitan migrants make an energy impact on the area, due in part, to their characteristics, housing, and type of energy consumption, but also because of differences in the way they use energy. In these ways they add an element of heterogeneity to the rural community, as well as increased demand for energy consumption.

Profile of North Dakota's petroleum work force, 1981-82.
Chase, R.A.; Leistritz, F.L.
Fargo, N.D. : Dept. of Agricultural Economics, North Dakota Agricultural Experiment Station.
Agricultural economics report (174): 67 p.; Sept 1983. Includes 35 references.

Language: English

Descriptors: North Dakota; Petroleum; Development; Employment; Population growth; Occupations; Housing; Socioeconomic factors; Statistical data; Rural areas

Abstract: Extract: Petroleum development in North Dakota's Williston Basin was intense during 1980 and 1981. This rapid rise in petroleum development in North Dakota has created interest regarding employment opportunities and population growth in rural communities in the western part of North Dakota. The objectives of the study were to determine the occupations, locational origins, housing requirements, commuting patterns, and family characteristics of workers; and to provide the basic parameters in determining the public sector impacts of the in-migrating workers and their dependents. Data were obtained from a questionnaire sent to workers.

Rural sociology v. 54 (3): p. 301-326; 1989. Includes references.

Language: English

Descriptors: U.S.A.; Population distribution; Trends; History; Urban rural migration; Employment; Income distribution

Abstract: This paper examines recent nonmetropolitan population redistribution trends and places them in historical context. Between 1980 and 1987, nonmetropolitan areas grew by 4 percent despite a slight migration loss. Metropolitan growth rates again exceeded those in nonmetropolitan areas during the period in sharp contrast to the trend of the 1970s. The nonmetropolitan population and migration gains between 1980 and 1987 are neither as large nor widespread as those during the 1970s but they are quite substantial by any historical standard. There is little evidence in the data for the 1980s suggesting a return to an era of substantial outmigration.

Language: English

Descriptors: Alabama; Arkansas; Georgia; North Carolina; Oklahoma; Tennessee; Virginia; Rural housing; Rural communities; Population change; Program evaluation; Local government; Regional surveys

Abstract: Adequate and affordable housing continues to be a serious problem in many rural areas of the Southern United States. This problem has been exacerbated by several major events in the past two decades, including the "population turnaround" in the 1970s, which increased the demand for housing as the number of people living in rural areas increased. The housing affordability crisis then resulted from a spiraling rise in housing costs greater than household annual income and a reduction in federal spending for housing programs. The combined effect of these events suggests local communities must now look more to state level initiatives and to themselves to provide necessary funding and action to address housing needs. Seven hundred and eighty-six "housing actors" (governing officials, housing intermediaries, and housing leaders) from four communities in each of seven Southern states completed a mail survey (modified TDM) on their receptiveness towards existing housing programs and future housing initiatives. The results show that more traditional programs received greater support than those requiring new types of local finding or action. The results also suggest that more and better information transfer about housing programs could aid these housing actors in their evaluation of housing initiatives.

Descriptors: North central states of U.S.A.; Western states of U.S.A.; Population growth; Migration; Birth rate; Rural urban relations; Family structure; Trends; Age composition

131 **NAL Call No: HT401.R94**
Turnaround migrants: grubby economics or delightful indulgence in ruralism?
Williams, J.D.
Ames, Iowa : Rural Sociological Society.
The Rural sociologist v. 2 (2): p. 104-108; 1982 Mar. Includes references.

Language: English

Descriptors: California; Arizona; Urban rural migration; Life style; Economic factors; Rural urban migration

132 **NAL Call No: HB1966.S8W45**
Twentieth century out-migration of America's farm population.
Weil, Richard H.
1980.

iii, 81 leaves : ill., maps ; 28 cm. Cover title. Typescript (photocopy). Bibliography: leaves 77-81.

Language: English

Descriptors: Rural population; Rural-urban migration; United States; Farmers; South Dakota; Statistics

133 **NAL Call No: 280.8 J822**
Undocumented Mexico-U.S. migration and the returns to households in rural Mexico.
Taylor, J.E.
Ames, Iowa : American Agricultural Economics Association.
American journal of agricultural economics v. 69 (3): p. 626-638; 1987 Aug. Includes references.

Language: English

Descriptors: Mexico; U.S.A.; Migrant labor; Migration; Labor mobility; Household income; Rural welfare

134 **NAL Call No: HT401.R94**
Urban growth management and the decline in available housing for migrant farmworkers.
Nelson, A.C.
University Park, Pa. : Rural Sociological Society.
The Rural sociologist v. 6 (2): p. 80-87; 1986 Mar. Includes references.

Language: English

Descriptors: Oregon; Housing costs; Low income groups; Migrant labor; Suburban areas; Urban rural migration; Rural economy; Case studies

135 **NAL Call No: HD1751.A1S73**
Urban land conversion in Florida's metropolitan areas.
Reynolds, J.E.; Dillman, B.L.
Gainesville, Fla. : The Department.
Staff paper - University of Florida, Food and Resource Economics Department, Institute of Food and Agricultural Sciences (401): 18 p.; 1990 Dec. Includes references.

Language: English

Descriptors: Florida; Land use; Urban areas; Population growth; Land diversion; Rural urban relations

136 **NAL Call No: 284.8 F31K**
U.S. agriculture: hard realities and new opportunities.
Duncan, M.R.
Kansas City, Mo. : Federal Reserve Bank of Kansas City.
Economic review v. 74 (2): p. 3-20; 1989 Feb. Includes references.

Language: English

Descriptors: U.S.A.; Agricultural policy; Rural economy; Structural change; Rural urban relations; Trends; Demography; Population change; Rural population; Life style; Technical progress; Productivity; Gatt; International trade; Agricultural trade; Economic development; Rural development; Balance sheets; Input output analysis

137 **NAL Call No: HT401.S72**
Who are the rural entrepreneurs?
Hoy, F.S.
Mississippi State, Miss. : The Center.
SRDC series - Southern Rural Development Center (97): p. 7-14; 1987 Feb. Paper presented at the "National Rural Entrepreneurship Symposium," February 10-12, 1987, Knoxville, Tennessee. Includes references.

Language: English

Descriptors: U.S.A.; Georgia; Entrepreneurship; Rural development; Demography; Attitudes; Behavior; Characterization; Rural women; Community programs; Small businesses; Rural population; Rural urban migration; Rural communities
